1. NAME AND MAILING ADDRESS OF PERSON OR FIRM	2. LOCATION
3. REGULATED ARTICLE(S): Citrus Fruit	
4. APPLICABLE STATE QUARANTINE(S) OR REGULATIONS:	

I / We agree to handle, pack, process, and move regulated articles in accordance with applicable plant quarantines; use all permits and certificates in accordance with instructions; maintain and offer for inspection such records as may be required; and abide by the following stipulations:

- The fruit shipping season for this agreement will begin on _____ and will expire on _____.
Date Date
- A designated person shall be assigned the responsibility to implement and supervise the requirements of this agreement. The person's name and phone number shall be included in the following statement:

I/We, representing _____, do hereby designate and appoint _____,
Company Name Name (Print)

Phone Number _____, as our agent who shall have full responsibility to see that all harvesting subcontractors comply with all requirements of this agreement.
- Citrus fruit that is processed through said packinghouse, under this agreement, shall come from sources certified by the Department as meeting all the necessary requirements as listed in the "Protocol for the Exportation of Fresh Fruits from Florida. A copy of the Protocol has been provided and is incorporated by reference.
- When receiving harvested certified fruit, each bin of fruit shall bear an orange identification card that is legible and visible to the inspector with the Caribbean Fruit Fly Certification Designated Area Number and/or letter suffix and date of harvest listed.
- Prior to harvesting bins being unloaded from a transport truck, all bins must be checked for any missing or non-legible orange identification cards. In order to maintain the identity of certified fruit, any missing cards must be replaced.
- The identity of certified fruit will be maintained at all times. Protocol fruit will be stored in segregated areas of the packinghouse which are accessible for inspection. Ample space must be allocated for separation of certified and non-certified fruit. Upon request to get an accurate count of Protocol fruit in the packinghouse, the receiving manager will make this information available to Protocol personnel.

7. Protocol fruit will be packed only on well marked line(s) with signs provided by the Department. This will only occur under the direct supervision of a Department representative to ensure no mixing of fruit from non-designated areas or from other designated areas. When switching from one certified designated area to another certified designated area, fruit may be brought up to the second grading table and stopped until the remaining fruit on the line is packed or discarded, to prevent commingling. When running non-certified fruit prior to running certified fruit, the line(s) will be thoroughly cleaned and checked for any fruit which could be left from the previous run.
8. When dumping of Protocol certified fruit has started, a sample of the orange identification card for each designated area and a trip ticket with Twp-Rge-Sec and designated area will be hand carried to a Department representative or PIQ house official.
9. After each harvesting bin is dumped, all orange identification cards shall be removed and all bins completely emptied before bins are returned to the harvester.
10. As Protocol fruit is processed and packed, each carton shall be labeled with a special Caribbean Fruit Fly Certification stamp, as specified by the Department. The stamp will bear the designated area number and the appropriate wording in compliance with the Protocol. **All wording, numbers and alphabetical suffixes must be legible.** Labels that are incorrect or illegible will cause the citrus fruit to be disqualified for certification. Certification can be denied by the Department or it's authorized representative.
11. All cartons of packed fruit, bearing the designated area number, shall be stored in a well-marked area with signs provided by the department, segregated from all other non-certified fruit and be accessible for inspection. Each individual pallet shall have an orange identification card for each designated area with the following information:
 - A. Designated Area Number;
 - B. Date harvested.

****It is of utmost importance that the identity of the certified fruit be maintained at all times. Should the identity of the certified fruit become questionable, certification may be refused and fruit disqualified for shipping under this compliance agreement.**
12. A Citrus Manifest shall accompany each shipment of certified fruit which shall be issued and signed by a representative of the Department at the time the shipment is loaded on the transporting vehicle. After loading is completed, Department seals shall be attached to each door latch and shall remain affixed until reaching its destination. Packinghouses shall assign a responsible person to place FDACS Division of Fruit and Vegetable seals on trailers upon completion of loading. Trailers not properly sealed on side and rear doors, will be rejected at ports of export.
13. It shall be the responsibility of your company or appointed agent to notify the appropriate Department inspector of all scheduled packing dates for fruit under this agreement. **Notice shall be given at least 24 hours in advance.**
14. Cartons marked for the Caribbean Fruit Fly Protocol cannot be used for cold treatment.
15. Any fruit that fails or is disqualified for not meeting Protocol requirements shall not be packed in cartons marked for Protocol. Cartons bearing a designated area number cannot be used to ship non-certified fruit or fruit from another designated area.

5. SIGNATURE	6. TITLE	7. DATE SIGNED
The affixing of the signatures below will validate this agreement, which shall remain in effect until canceled, but may be revised as necessary or revoked for noncompliance.		8. AGREEMENT NO.
